

L27/38 fuel system upgrade

MAN PrimeServ

By installing the fuel system upgrade and the included improved fuel filters in strategically safe areas, MAN PrimeServ Frederikshavn makes sure that your L27/38 will be updated to today's modern standards.

After the retrofit, your L27/38 engine will fulfill the latest SOLAS regulations, with improved general safety and reliability of your vessel.

The graphic below illustrates how the fuel pipes have been removed from the hot areas of the exhaust piping and turbocharger, and reinstalled in safer areas.

The external fuel piping needs to be changed accordingly, and universal pipes and connectors are included in the upgrade package. Improved fuel filtration units are also included in the package.

Installation of the Fuel system upgrade package requires a MAN Energy Solutions superintendent with expert knowledge of the L27/38 propulsion engine.

If you have maintenance planned in the near future, it would be preferable to order the fuel system upgrade package, and have the MAN PrimeServ service engineer install it when on board already.

L27/38 fuel system upgrade

MAN PrimeServ

Key benefits

- Order now, install when convenient
- Improved filtration
- Increased fuel equipment lifetime
- Reduced risk of fire
