

Sea ahead. We believe in the power of Digital. **MAN Data+**

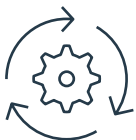

We live in challenging times. Future-proofing and digital monitoring are becoming more and more crucial. Our digital solutions help you stay competitive, fast and safe in the everchanging marine sector.

**Data is the backbone of digitalization.
Leverage its potential. With us.**

In the ever-developing digital world, data is a key enabler of digital transformation. Engines generate thousands of data points. MAN Data+ enables you to find value in a sea of data. MAN Data+ securely, and efficiently collects and

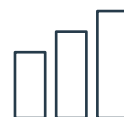

evaluates operating and sensor data. It combines high-quality data, data integration, and technology with profound domain knowledge. We help you create maximum value from your equipment data and turn it into a key vehicle in meeting the

growing demands of availability, efficiency and decarbonization. In addition, that data can help you identify new opportunities, and make better decisions.

Holistic Data aggregation

A service of MAN CEON, MAN Data+ securely and intelligently collects and integrates engine data in a consumable and comprehensive way.

Hands-on insights

Create your own visualizations, generate insights through the application of machine learning and process simulations.

High security and availability standards

Your data is safe with us. MAN Data+ meets the requirements for end-to-end security and guarantees the data availability for years.

System compatibility

Integrate your MAN-ES engine data with other platforms and systems with APIs.

Discover new pathways for innovation and growth.

Reliable and safe solutions for data leverage.

MAN Data+ combines profound domain knowledge and next-level technology for maximum value creation. Once captured and aggregated, we use machine learning and process simulations to visualize data and generate valuable insights. This data can also be easily integrated into your platforms and systems. Fully standardized data structures let customers seamlessly transfer solutions from one asset to another. As always, our goal is to help customers make better decisions and solve real-world challenges.

The benefits

- **Secure data collection, transmission and storage**
- **Easy data integration with APIs**
- **Functional and scalable data structure**
- **Data visualization**

Our digital backbone: MAN CEON

MAN CEON is the platform solution behind all our digital products. It enables holistic data aggregation for real-time monitoring as well as data insights with the highest security standard. The result: More data value, and thus optimal availability and efficiency.

MAN Data+ helps make your engines more..
