

# We'll keep you running

MAN PrimeServ

Some things never change, and sometimes that's a good thing. No matter where in the world you work with us, you will always find the same rigorous quality standards and aggressive turn-around times to keep your operations productive.

We will help you extend the service life of your equipment, cut operating costs through machine performance improvement and will have you up and running again quickly when something has gone wrong.

Using the latest technologies, our experts efficiently perform maintenance and major repairs of industrial compressors, steam turbines, expanders, gas turbines, and gear wheel seats as well as other rotating equipment to duty.

To guarantee our worldwide quality standards, our workshops use standardized methods and reporting for diagnosis and quality inspection, work procedures and repair instructions.
