

Service Kits for Gas Turbines

MAN PrimeServ has combined spare parts regularly used for performing the scheduled inspections, maintenance and installation works on your MAN Energy Solutions gas turbine into so-called service kits.

Availability

Safety

Efficiency

Capacity

Sustainability

Features

- Dedicated sets of spare parts used for typical inspection, maintenance and installation work
- Tailor-made service kit recommendation for specific equipment

Benefits

- Simplified spare parts management
- Direct access to the most important spare parts
- Content exactly matched to typical service and maintenance work

Service Kits

Gas Turbines MGT & THM

Service kits are the foundation of your spare parts stock.

Complete storage of any spare part that may be required for your MAN Energy Solutions gas turbine unit is simply not possible due to economical and logistical reasons.

Service Solution

In order to simplify your spare parts management and to enable you to have the most important spare parts for typical service and maintenance works on your MGT or THM gas turbine directly available on-site, MAN PrimeServ has defined specific service kits for your gas turbine. Regardless of whether stocking any strategic spares or consumables, a complete set of service kits dedicated to your gas turbine should always be available on-site to make the bare turbine accessible at any time.

These service kits contain spare parts regularly used during the scheduled inspections of the gas turbine as well as during assembly and installation work. The content of each service kit is put together by considering the typical scope of these service and maintenance measures and the longstanding experience of the MAN PrimeServ field service representatives.

MAN PrimeServ will provide you with a detailed listing of the service kits recommended for your MGT or THM gas turbine. The listing can be provided as a stand-alone service kit recommendation or as a central element of a comprehensive spare parts concept taking into consideration your individual operational requirements and maintenance strategy.

Comprehensive Service Solutions

MAN PrimeServ provides you comprehensive service solutions to support your business – no matter if you want to optimize reliability, operating costs, environmental sustainability or anything else.
