Martin Oetjen appointed new member of the Executive Board for Supply Chain and Production

New executive responsibilities combine Production and Purchasing

Martin Oetjen will be appointed to the Executive Board of MAN Energy Solutions on August 1, and will be responsible for the Supply Chain and Production division. His scope of responsibility will therefore combine the previously separate Production and Purchasing divisions. The 52-year-old qualified engineer has already been responsible for the Supply Chain role since January 2020, as chief representative of the company.

"Supply chain management is an important subject that we have accordingly given a seat at the executive table by way of this appointment," explains Dr. Uwe Lauber, Chief Executive Officer of MAN Energy Solutions. "I am pleased to be able to welcome Martin Oetjen, a long-time colleague and experienced Production team member, to the executive team."

Oetjen has already occupied various managerial positions in the company since 2012, and has been in charge of the Engine & Marine Systems strategic business unit since 2015. He began his professional career in 1995 at MAN Truck & Bus, and worked in various managerial roles for the Munich-based heavy goods vehicle manufacturer for a total of 17 years.

Martin Oetjen (52) will be the new member of the Executive Board for Supply Chain and Production at MAN Energy Solutions

MAN Energy Solutions enables its customers to achieve sustainable value creation in the transition towards a carbon neutral future. Addressing tomorrow's challenges within the marine, energy and industrial sectors, we improve efficiency and performance at a systemic level. Leading the way in advanced engineering for more than 250 years, we provide a unique portfolio of technologies. Headquartered in Germany, MAN Energy Solutions employs some 14,000 people at over 120 sites globally. Our after-sales brand, MAN PrimeServ, offers a vast network of service centres to our customers all over the world.
