## **MAN Energy Solutions Enters Innovation Partnership with Anglo-Eastern**

### **Cooperation agreement eyes digital solutions and industry insights for mutual benefit**

MAN Energy Solutions and Anglo-Eastern Ship Management Ltd. recently signed a cooperation agreement regarding a so-called 'Innovation Partnership'. Under the terms of the agreement, the two parties will – on an ongoing basis – exchange data and knowledge regarding the daily operation of engines, engine performance and maintenance, testing of digital products, development and creation of software, algorithms, and APIs, among other areas.

Carsten Ostenfeldt, Chief Operating Officer, Asia and Harald Klein, Chief Operating Officer, Europe, signed the agreement on behalf of Anglo-Eastern, while Stig Holm, Head of Marine & Power Digital Denmark, and Michael Petersen, Senior Vice President and Head of PrimeServ Denmark, signed on behalf of MAN Energy Solutions.

Ostenfeldt said: "We are very much looking forward to working with MAN Energy Solutions on this exciting project and gaining insight into the development of future digital solutions. We will allocate the appropriate resources to ensure the success of the project and expect to gain ever-more efficient tools to support the daily operation of our fleet."

Holm said: "We are very happy to have entered this project with such an able partner as Anglo-Eastern. For our part, we will get invaluable industry insight from a major, maritime ship-management organisation with substantial knowledge of the daily and strategic operation of a large fleet of diverse vessel types. This agreement gives us access to a large fleet where new products can be tested and we can receive operational feedback from crew and technical shore-staff alike."

The agreement is scheduled to run for a minimum of two years and the partners have agreed to meet every two months, beginning with a workshop on innovation in Copenhagen in December 2022.

### **About Anglo-Eastern**

Anglo-Eastern is a leading global provider of independent ship management services, with 650 vessels under full technical management, and over 250 under crew management. The group has nearly 50 years of experience and engages in all areas of ship management, crew management, and technical services for vessels of all types and sizes.
